EDUCATION

University of California, Irvine

September 2020 - June 2024

Bachelor of Science in Computer Science, Specialization in Intelligent Systems

Irvine, CA

- **GPA**: 3.63/4.0 (8x Dean's List)
- Leadership & Involvement: ICS Student Council Projects Committee | Mentor for FUSION
- Courses: Computer Vision, Machine Learning, Artificial Intelligence, Data Structures & Algorithms, System Design

EXPERIENCE

Software Developer

November 2023 - Present

ICS Student Council - ZotMeal

Irvine, CA

- Led front-end development by designing Figma mockups, creating Android and iOS compatible React Native components, and integrating with the back-end using tRPC
- Sped up daily and weekly back-end microservices by 50% by parallelizing async operations for all AWS Lambda functions
- Slashed setup and teardown times for PostgreSQL integration tests by 30% by adopting Testcontainers to simplify database test suites in Vitest
- Built an events listing feature end-to-end by utilizing Cheerio and Axios to scrape dining hall event data and display it on the app

Software Lead

November 2023 - May 2024

FUSION Engineering Project

Irvine, CA

- Led the development of embedded systems software within a cross-functional team of 11 engineers for a gesture-controlled robotic arm using Arduino microcontrollers
- Achieved 1st place and won 2 additional awards at FUSIONCon: Sponsor's Choice and Most Innovative Design
- Mentored 2 software developers, accelerating their onboarding process by organizing workshops, code reviews, and coding sessions, fostering a culture of learning and collaboration

Software Engineer Intern

July 2023 - July 2024

Thaddeus Resource Center

La Verne, CA

- Led a website overhaul that reduced operational costs by 78%, optimized site performance using static generation, and secured more valuable internships for the organization: Pitched the project for CEO approval, transitioned from Webflow to Next.js and Firebase, led a team of 6 using Agile and CI/CD methodologies, and deployed as a Docker container to DigitalOcean
- \bullet Saved an estimated 3 hours of CI and developer time per week by creating a streamlined CI/CD pipeline with GitHub Actions, PNPM, and Docker
- Accelerated CI execution times by 50% through parallelizing Jest and Playwright test suites and caching dependencies

Projects

Geospatial Web Game | TypeScript, Python, Next.js | GitHub

April 2024

- Won 2 awards at Data@UCI's Atlantis Datathon: People's Choice and Best Use of Melissa API or Data Sets
- Developed a full-stack browser game in 24 hours that utilizes a reverse geocoder API to generate geospatial clues for players to guess Orange County cities
- Built a custom geospatial dataset by cleaning and processing data with pandas to derive clues for 34 cities

NASA Radiation Microscopy Generative AI Model | Python | GitHub

March 2023 - June 2023

- Furthered research on the effects of cosmic radiation on astronauts by developing a Generative Adversarial Network with PyTorch Lightning to generate synthetic images that mimic irradiated cells
- Classified images with 93% accuracy on a large subset of the domain by leveraging ResNet101
- Presented project results to NASA GeneLab scientists after developing the project in Agile sprints

TECHNICAL SKILLS

Programming Languages: TypeScript/JavaScript, Golang, Rust, C, C++, Java, SQL, HTML, CSS/Tailwind CSS Tech: React.js, Node.js, ORM, MySQL, Postman, Cypress, AWS, Azure, Vercel, NoSQL, CUDA, NumPy Other: GitLab, Scrum, Jira/Kanban, Linux, Jupyter, Bash/Powershell, Shell Scripting, HTTP, SDLC
